

Early Head Start Program Information Report (PIR) Data Available through CLASP's DataFinder

CLASP's [DataFinder](#) is a custom, easy-to-use tool developed to provide select demographic information as well as administrative data on programs that affect low-income people and families. Users can create and download custom tables that present a national picture, a state picture, or a comparative look at states and communities. State data are available on Head Start participation, child care spending and participation, TANF expenditures, young child demographics, and poverty.

The following categories represent the Early Head Start state data available through this tool, for years 2006-2008. DataFinder will be updated to include 2009 data when finalized. Contact Elizabeth Hoffmann with any questions at 202-906-8008 or ehoffmann@clasp.org.

Grantees/Delegates and Enrollment

- Number of Early Head Start Grantees/Delegates
- Funded Enrollment for Early Head Start - Children and Pregnant Women
