Endnotes

¹ Data includes all Head Start programs in the state, including Head Start preschool, Early Head Start, Migrant and Seasonal Head Start, and American Indian and Alaskan Native programs.

² Each grantee and delegate agency must submit a separate PIR report annually. Further, programs operating Head Start and Early Head Start services must submit a separate report for the Head Start program and the Early Head Start program. Therefore, for the purposes of these PIR profiles, each Head Start, Early Head Start, and delegate agency is counted separately in the total number of grantees/delegates.

³ Includes slots funded by the U.S. Department of Health and Human Services, Administration for Children and Families.

⁴ Includes slots funded by all sources other than ACF (for example, states, local non-profits, private sector, school districts) that also report PIR data to the Office of Head Start. States may fund additional Head Start slots that may not be part of the federal reporting and PIR data collection process.

⁵ The PIR defines “full day” programs as those operating at least six hours per day and “part day” programs as those operating less than six hours per day. Percentages may not add to 100 percent due to rounding.

⁶ The PIR collects data on all children and pregnant women enrolled at any point, including those who do not complete the year. Since some participants drop out during the program year and are replaced, the number of total actual participants exceeds the number of Head Start slots.

⁷ Head Start collects data on various language groups. In 2011, across the United States, the PIR reported that the primary language spoken in the home for 70 percent of all Head Start participants was English and for 26 percent of all Head Start participants was Spanish. One percent or less of all participants were reported in each of the following primary language categories: Middle Eastern/South Asian languages; East Asian languages; European/Slavic languages; Native Central American, South American, and Mexican languages; Caribbean languages; Native North American/Alaskan Native languages; Pacific Island languages; and African languages. The primary language spoken in the home could also be reported as “other” or “unspecified,” and across the U.S., less than one percent of Head Start participants were reported in each of these categories.

⁸ Percentages do not add up to 100 percent because persons of Hispanic ethnicity may be of any race. In 2005, race categories on the PIR were changed. The “Hispanic” category, previously included as a race category, was moved to a separate question that asks for the number of children and pregnant women who were of Hispanic origin, regardless of racial background. Head Start participants whose race is “unspecified” may reflect these changes in race and ethnicity categories.

⁹ The PIR includes all children who were enrolled in Head Start at any point during the program year, including those who dropped out before 45 days of enrollment, the time frame during which Head Start programs are required to provide medical and dental screenings.

¹⁰ “Up-to-date on immunizations” includes those children who are not on the schedule recommended for their age group but who have been brought up to date to the extent possible given the late start on their immunization schedule.

¹¹ This average includes all programs in the state, including part-day programs, programs that operate for a short period of time such as Migrant and Seasonal Programs, and programs that may only operate for part of a week. Therefore, the range of teacher salaries may vary greatly throughout the state.

¹² Percentages may not add to 100% due to rounding.

¹³ See endnote 8. Child development staff includes teachers, assistant teachers, home visitors, and family child care providers.
