

The Economic Imperative for More Adults to Complete College Louisiana

Higher Skills Needed for Today's Economic Recovery And Tomorrow's Economic Growth

Less Educated Workers are More Likely to Be Out of Work

- Even during tough economic times, skills and credentials matter for labor market success.
- In Louisiana, adults without a high school credential are over twice as likely to be out of work as adults with some college education (14.3 percent vs. 6.2 percent).
- Adults in Louisiana who have completed high school fare much better than dropouts. Yet even these workers face unemployment rates substantially higher than adults with some college, and over twice as high as those with a bachelor's degree (7.8 percent vs. 3.4 percent).

Demand for College-Educated Workers will Keep Rising Over the Next Ten Years

- Between 2008 and 2018, demand for workers with postsecondary education will rise by 6.3 percent in Louisiana, while demand for other workers will grow more slowly at 5.9 percent.
- Between 2008 and 2018, state labor demand will increase slightly more for college-educated workers (65,000 additional jobs) than for high school graduates and dropouts (61,000 additional jobs).
- By 2018, nearly half of jobs in Louisiana (and nearly two-thirds of jobs in the nation) will require some postsecondary education or training.

The Economic Imperative for More Adults to Complete College Louisiana

Aging Population Means No Future Growth in High School Graduates, and Sharply Rising College Enrollment Among Adults

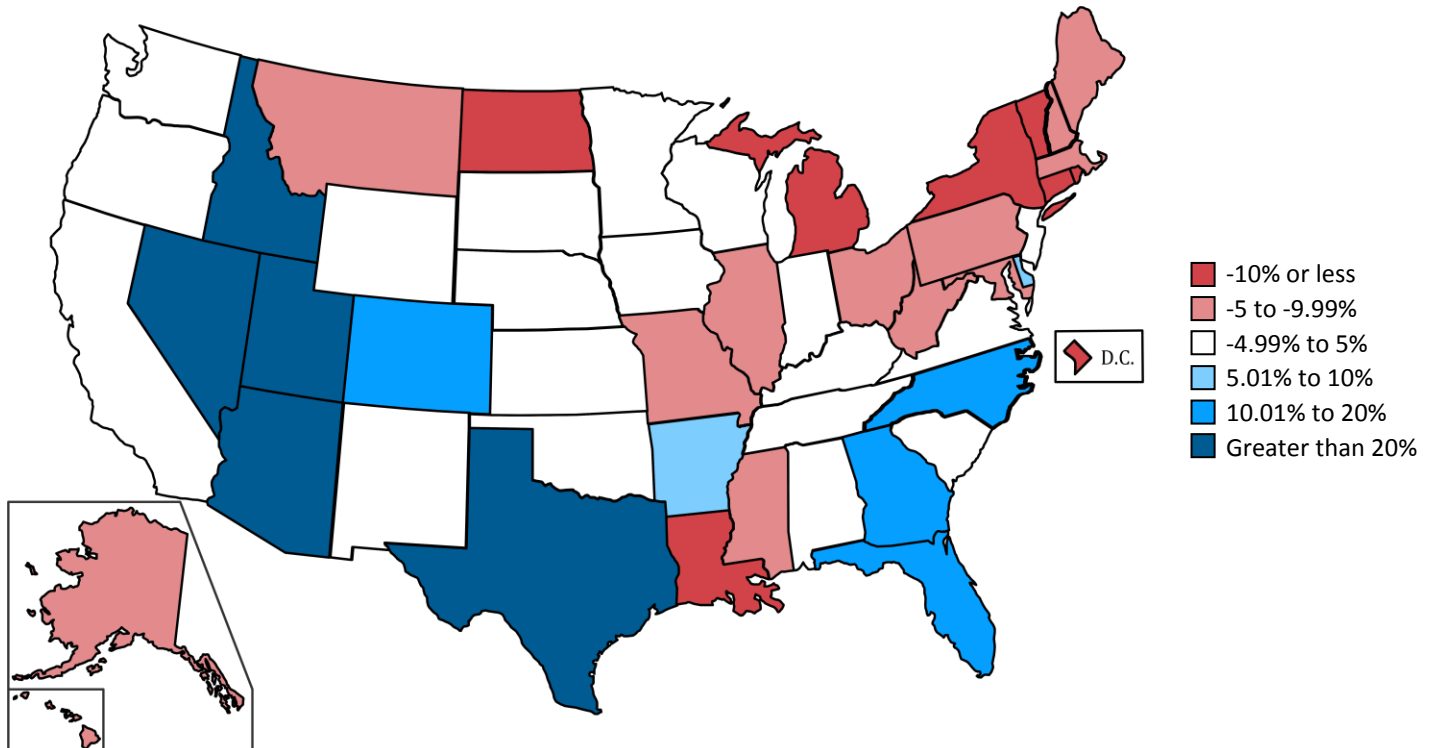

**Louisiana Public High School Graduates,
1999-2005 (actual) and 2005-2020 (projected)**

Number of High School Graduates Will Level Off, But Trends Split by Race/Ethnicity

- From 2010 to 2020 there will be a steep drop in the number of high school graduates in Louisiana, with a projected statewide decrease of 20.1 percent. This is the sharpest projected decline of any state. (The nationwide trend is flat.)
- Different racial/ethnic groups will experience varied rates of growth and decline in public high school graduates statewide. In particular, the number of Hispanic and Asian/Pacific Islander graduates will slightly increase, while the number of graduates from other racial/ethnic groups will markedly decrease.

Projected Change between 2010 and 2020 in Total High School Graduates, by State
