

The Economic Imperative for More Adults to Complete College Maine

Higher Skills Needed for Today's Economic Recovery And Tomorrow's Economic Growth

Less Educated Workers are More Likely to Be Out of Work

- Even during tough economic times, skills and credentials matter for labor market success.
- In Maine, adults without a high school credential are almost three times as likely to be out of work as adults with some college education (20.9 percent vs. 7.6 percent).
- Adults in Maine who have completed high school fare much better than dropouts. Yet even these workers face unemployment rates substantially higher than adults with an associate's degree, and almost twice as high as those with a bachelor's degree (6.4 percent vs. 3.3 percent).

Demand for College-Educated Workers will Keep Rising Over the Next Ten Years

- Between 2008 and 2018, demand for workers with postsecondary education will rise by 3.9 percent in Maine, while demand for other workers will stay relatively flat, with a growth rate of 0.8 percent.
- Between 2008 and 2018, state labor demand will increase nearly seven times as much for college-educated workers (15,000 additional jobs) as for high school graduates and dropouts (2,200 additional jobs).
- By 2018, over 58 percent of jobs in Maine (and nearly two-thirds of jobs in the nation) will require some postsecondary education or training.

The Economic Imperative for More Adults to Complete College Maine

Aging Population Means No Future Growth in High School Graduates, and Sharply Rising College Enrollment Among Adults

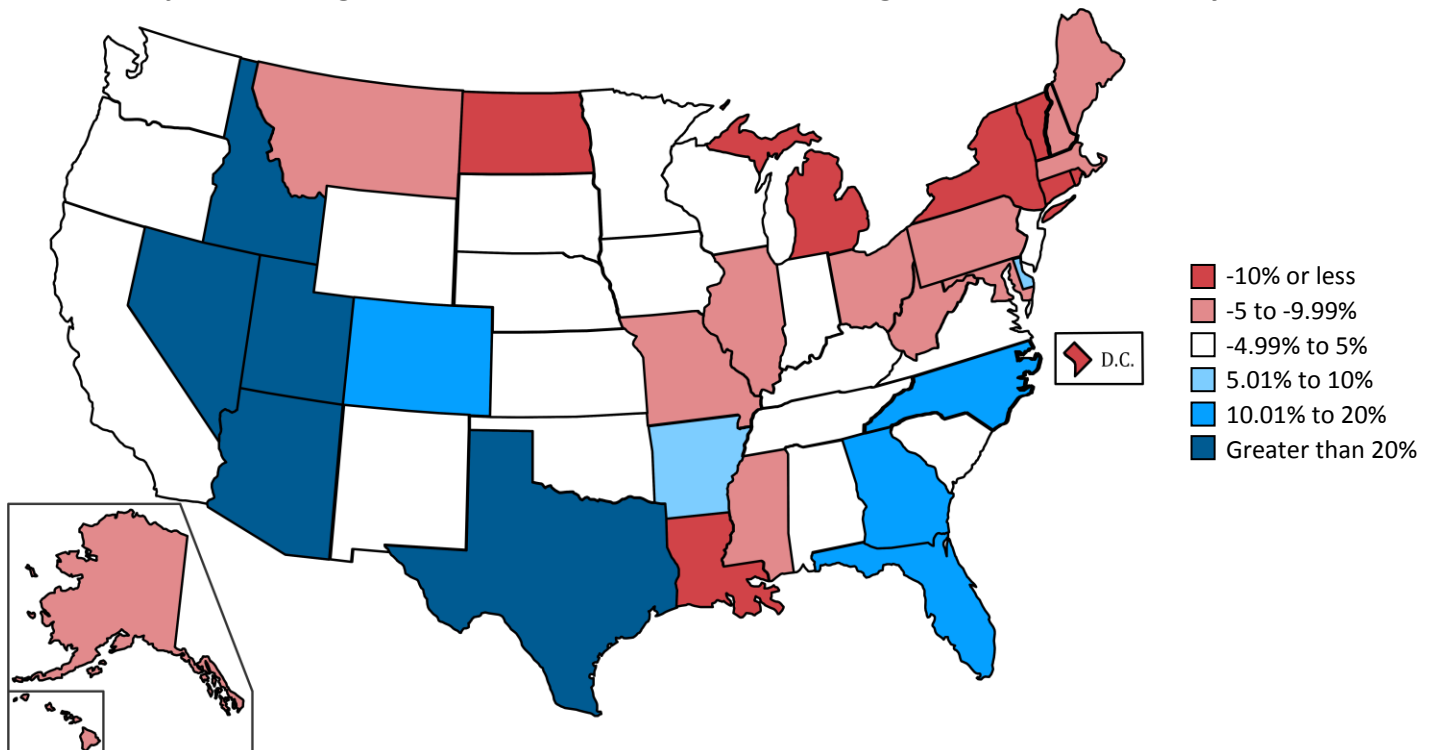

**Maine Public High School Graduates,
1999-2005 (actual) and 2005-2020 (projected)**

Number of High School Graduates Will Level Off, But Trends Split by Race/Ethnicity

- From 2010 to 2020 there will be a drop in the number of high school graduates in Maine, with a projected statewide decline of 7.6 percent. This is worse than the trend in most states. (The nationwide trend is flat.)
- Different racial/ethnic groups will experience varied rates of growth and decline in public high school graduates statewide. In particular, the number of white non-Hispanic graduates will fall, while the number of graduates from other racial/ethnic groups will rise.

Projected Change between 2010 and 2020 in Total High School Graduates, by State
