

## **Data Snapshot of Immigrants in Oregon: Effective COVID Relief Depends on the Inclusion of Immigrants**

The COVID-19 crisis has shown that we are interconnected: the health and prosperity of *each* of us depends on the health and prosperity of *all* of us. Yet, the legislation enacted to date has excluded millions of immigrants and their families from health care and economic relief. A response that leaves out immigrants and their families in Oregon—many of whom are providing care for our loved ones and delivering groceries—will undermine our public health and economic recovery. This data snapshot describes immigrants in Oregon, some of the barriers to accessing health care they face, and how the Health and Economic Recovery Omnibus Emergency Solutions (“HEROES”) Act would make our state and nation healthier and safer.

### **Immigrants in Oregon:**

- Approximately **434,000 people in Oregon**, including **144,000 children**, live in families with at least one **noncitizen** in the household.<sup>1</sup>
- **12% of Oregon workers in frontline industries** are immigrants, including about **12%** of workers in the grocery, **11%** of workers in health care, and **29%** of workers in the building cleaning services industries.<sup>2</sup>

### **Barriers Accessing Essential Services for Testing and Treatment of COVID-19 for Immigrants in Oregon:**

- Because of the public charge regulation’s “chilling effect,” immigrant families, including many who are not subject to the public charge test, are avoiding public programs.<sup>3</sup> About **291,000 people in Oregon could potentially be deterred from public programs** because of immigration-related consequences.<sup>4</sup>
- Rapid job loss is leading to declines in employer-provided health insurance coverage,<sup>5</sup> which in turn has increased need for publicly funded health care. If unemployment were to reach 17.5%, approximately **7,000 more noncitizens in low-income Oregon households would be uninsured.**<sup>6</sup>

### **Among Ways the HEROES Act Would Help Immigrants in Oregon:**

- Provides economic relief to approximately **96,000 children and adults** in Oregon households that filed taxes with an Individual Taxpayer Identification Number (ITIN).<sup>7</sup>
- The direct economic impact of the inclusion of ITIN households in Coronavirus Aid, Relief, and Economic Security (CARES) Act (retroactively) and HEROES Act would be approximately **\$200,751,000.**<sup>8</sup> As recipients use these funds to pay rent and buy groceries, they will strengthen the Oregon economy.
