Babies and Toddlers in Child Care: State policy and practice for healthy development

Smart Start Conference
Greensboro, NC
May 7, 2009

Rachel Schumacher and Elizabeth Hoffmann
Session overview

- Babies and toddlers in child care: the context
- What babies and toddlers in child care need to thrive and policies to address those needs
  - A policy framework
  - Ideas from states
- Next steps
- Discussion
Babies and toddlers in child care
Babies are in child care for many hours...

Hours Spent in Nonparental Care by Children Under 3 with Employed Mothers, 2002

- No Hours in Care, 28%
- 35 or More Hours, 38%
- 15-34 Hours, 17%
- 1-14 Hours, 17%

...and in a variety of settings

Primary child care arrangements for children birth to 3 with employed mothers

Note: Percentages may not add to 100% due to rounding.

Social and economic disparities impact early childhood development
What babies in child care need & policy framework
Key principles: what babies and toddlers in child care need

- Healthy and safe environments in which to explore and learn.
- Nurturing, responsive providers and caregivers they can trust to care for them as they grow and learn.
- Parents, providers, and caregivers supported by and linked to community resources.
- Their families to have access to quality options for their care.
Why nurturing, responsive care?

“Human relationships and the effect of relationships on relationships, are the building blocks of healthy human development.”

How do babies in child care feel secure?

- When caregiver/child relationships are:
  - Nurturing
  - Individualized
  - Responsive
  - Predictable

- Infants in secure attachment relationships with their caregivers are more likely to play, explore, and interact with adults in their child care setting

How does security help development from birth to three?

- **Identity** (16-36 mo.)
- **Exploration** (8 to 18 months)
- **Security** (birth to 9 months)

Source: Caring for Infants and Toddlers in Groups: Developmentally Appropriate Practice, ZERO TO THREE
Recommendations to support nurturing and responsive care

Nurturing and responsive providers and caregivers

- Core competencies
- Training, education, and support
- Continuity of care
- Compensation
- Cultural competence
What does continuity of care look like?

- Primary caregiver cares for child most of the time
- Adult:child relationship maintained from birth to three years
- May stay in the same environment or move to a new one as children age and interests change
- Same-age or mixed-age groups
State policies can support continuity

**Policies:**
- Licensing can allow mixed ages, require primary care
- Professional development systems can teach providers how to promote continuity of care
- Child care lead agency can provide financial incentives/support to center and FCC providers to implement continuity of care
Indiana promotes continuity of care in licensing

- Centers required to make a reasonable effort to provide continuity of care for children under 30 months of age

- May mix children 6 weeks to 36 months of age in one classroom under the following conditions:
  - A child/staff ratio of 4:1; group size of 8
  - No more than 3 children under 12 months old
  - Developmentally appropriate program, furnishings, and equipment for all children

State policies can support a culturally competent and diverse workforce

POLICIES:

• Provide training and technical assistance on licensure in multiple languages
• Create incentives, including differential payment rates, for providers who complete coursework or training on cultural competence or have bilingual endorsement
• Identify and support existing FFN caregivers. Collaborate with community-based organizations to ensure access to appropriate training, professional development, and family support programs.
Minnesota reaches out to family, friend, and neighbor care (FFN)

- 2004 study: 78% of MN infants/toddlers in FFN
- MN Department of Human Services CCR&R contract now makes FFN outreach a core provider service
- In 2007, the Legislature authorized $750,000 to expand services statewide for FFN caregivers
  - Competitive grants to community-based organizations
  - Tailored to local needs, e.g. home visits, connecting immigrant FFN caregivers to resources
  - UMN evaluation to measure impact caregivers’ knowledge, practice and use of community resources
Why link babies in child care to comprehensive services?

- Babies need good health and supported families to learn and thrive
- Demographic and environmental factors put infants/toddlers at risk for unhealthy development

- Economic hardship
- Inadequate nutrition
- Maternal depression
- Environmental toxins
- Lower quality child care
- Child abuse or neglect
- Parental substance abuse
- Family violence

Source: National Center on Children in Poverty
Leads to early identification and treatment

- Lessens the impact of a developmental delay or disability on the child and the family
- Yet many vulnerable babies and toddlers unable to access needed developmental services
  - Low-income children less likely to have regular place to get health care or health insurance
  - In 2007, 2.5% of all infants/toddlers received IDEA Part C services; 6% of all three to five year olds received IDEA Part B
  - Only 8 states meet EPSDT benchmark of 80% receiving one visit/year for toddlers
Recommendations to link parents, providers, and caregivers to resources

Parents, providers, and caregivers linked to resources

Partner with parents
Screen vulnerable children
Link to comprehensive services
Recommendations to link parents, providers, and caregivers to resources

POLICIES:

• Contract with child care subsidy programs to meet Program Performance Standards for Early Head Start
• Coordinate with Medicaid EPSDT, IDEA – Part C, WIC, SNAP, TANF, social services, and health care
• Support infant/toddler mental health specialists and consultants
• Ensure FFN access to CACFP
Support EHS/Child Care partnerships

- Partner with centers or family child care serving vulnerable children to deliver EHS in those settings
- Deliver home-based EHS model to FFN
- Leverage resources to improve child care quality (i.e. joint training)

Provide resources and technical assistance for child care centers to become EHS grantees

- Award grants to help meet Performance Standards
- Conduct outreach to identify interested centers
20 States Building on EHS

States with in-depth initiative profiles

Other states with EHS initiatives included in full report

Recommendations to support healthy and safe environments

- Center ratios and group size
- Family child care ratio and group size
- Health and safety training
- Monitoring and technical assistance
Recommendations to support access to quality options for care

- Build quality supply
- Stable, quality subsidy policy
- Appropriate information on choosing care

- Policy framework
Charting Progress for Babies in Child Care

About this project
Research-based rationales are based on one of 15 recommendations in the Charting Progress Policy Framework.

Go to briefs and papers on how states can implement these recommendations.

CLASP’s Charting Progress for Babies in Child Care project is a multi-year effort to highlight state policies that support the healthy growth and development of infants and toddlers in child care settings, and to build an online resource to help states implement these policies. In the project’s first year, CLASP and ZERO TO THREE developed a Policy Framework with four key principles that babies and toddlers in child care need and 15 recommendations for states. CLASP is writing research-based rationales to support each of the 15 recommendations.

To date, CLASP has released the following products:

Policy Framework and Research-Based Rationales

Policy Framework Summary:
Sets forth 15 recommendations for states, supported by the research-based rationales below. January 2008 (also in PDF)

DID YOU KNOW?
Nearly half of children of immigrants live in families with incomes below the level necessary to afford basic needs, including child care.
What are next steps?
How you can chart progress for babies and toddlers in child care

- Visioning
  - Develop long-term goals for state policy using recommendations under one or more principles

- Conducting a policy audit
  - Compare specific policy ideas to your current state policies

- Advocating
  - Use CLASP information to help make the case

- Designing policies
  - See examples from other states and connect with them
