Continuity of Care:
A Critical Component of Quality for Babies and Toddlers in Child Care
Session Overview

- What do babies in child care need?
- What does continuity of care look like?
- Discussion: implementation challenges and opportunities
- A state policy framework to support continuity of care
- Next steps
- Resources
What Babies in Child Care Need
A strong foundation...

“Human relationships and the effect of relationships on relationships, are the building blocks of healthy human development.”

Research shows: Babies need a secure base

- Transitioning from room to room at pre-determined ages or stages can cause distress
- Fewer changes of primary caretaker during the day has been linked to fewer exhibited behavior problems in child care
- Higher numbers of changes in center or family child care providers in the earliest years have been linked to less outgoing and more aggressive behaviors among children at ages four and five
How do babies in child care feel secure?

- When caregiver/child relationships are:
  - Nurturing
  - Individualized
  - Responsive
  - Predictable

- Infants in secure attachment relationships with their caregivers are more likely to play, explore, and interact with adults in their child care setting

Secure early experiences help develop brain architecture

**Human Brain Development**

**Synapse Formation Dependent on Early Experiences**

- Sensory Pathways (Vision, Hearing)
- Language
- Higher Cognitive Function

- **Age**
  - Conception
  - Birth
  - (Months)
  - (Years)

What Does Continuity of Care Look Like?
What does it look like?

- Primary caregiver cares for child most of the time
- Adult:child relationship maintained from birth to three years
- May stay in the same environment or move to a new one as children age and interests change
- Same-age or mixed-age groups
Continuity of Care models

- Same-age group stays in same environment
  - Replace children who leave with same age range

- Same-age group moves to different rooms as they age
  - New cohort of babies start when others move up

- Mixed-age group stays in same environment
  - When children leave, may be replaced by any other age
  - Limit on number of infants in group, ratios and group size determined by age of youngest

Source: Ways to Provide Continuity of Care, PITC
What does it look like?: Educare

- Model programs in Chicago, Omaha, Milwaukee, Tulsa, Denver, Oklahoma City
  - Coming soon to Miami, Seattle, Yakima, Arizona
- Private dollars build state-of-the-art facilities; half of slots for 0-3
- “Braided” funds support quality
- Children stay with same caregiver until three, then move to 3 to 5 classroom
- Groups of 8, 1:3 adult-to-child ratios
How does security help development from birth to three?

- **Identity**
  (16 to 36 months)

- **Exploration**
  (8 to 18 months)

- **Security**
  (birth to 9 months)

Source: *Caring for Infants and Toddlers in Groups: Developmentally Appropriate Practice*, ZERO TO THREE
Discussion: Challenges and Opportunities
Talking about…

- **Challenges**
  - Change
  - Licensing and subsidy rules
  - Staff resistance:
    - “I am not a baby caregiver; I work with toddlers!”
  - Educating parents
  - Turnover
  - Cost

- **Opportunities**
  - Coming together as a program to assess capacity
  - Getting to know individual children, their needs and background
  - Better able to prevent health and safety issues
  - Develop long-term relationship with family
A Policy Framework that Supports Continuity of Care
Key principles: What babies and toddlers in child care need

- Nurturing, responsive providers and caregivers they can trust to care for them as they grow and learn.
- Healthy and safe environments in which to explore and learn.
- Their families to have access to quality options for their care.
- Parents, providers, and caregivers supported by and linked to community resources.
Policy recommendations to support nurturing and responsive care

1. Core competencies
2. Training, education, and support
3. Continuity of care
4. Compensation
5. Cultural competence

Nurturing and responsive providers and caregivers
State policies can support continuity

POLICIES:

• Licensing can allow mixed ages, require primary care
• Professional development systems can teach providers how to promote continuity of care
• Child care lead agency can provide financial incentives/support to center and FCC providers to implement continuity of care
Licensing policies

- Require a primary child care provider responsible for each infant and toddler
- Require that centers implement continuity of care strategies from entry into child care to age three
- Remove licensing barriers to operating with mixed-age groups
Licensing policies supporting continuity

Source: NARA 2005 Licensing Study
Example: Indiana licensing

- Centers required to make a reasonable effort to provide continuity of care for children under 30 months of age.
- May mix children 6 weeks to 36 months of age in one classroom under the following conditions:
  - A child/staff ratio of 4:1; group size of 8
  - No more than 3 children under 12 months old
  - Developmentally appropriate program, furnishings, and equipment for all children

Subsidy policy

- Raise child care subsidy payments to centers and family child care homes that implement continuity of care strategies with low-income infants and toddlers in their care
- Contract with providers to support and require continuity of care
Quality enhancement policies

- Train providers on methods to promote continuity of care
- Ensure that the standards, design, and incentives of state Quality Rating and Improvement Systems (QRIS) specifically address and encourage continuity of care techniques
- Develop and disseminate information and resources appropriate for family, friend, and neighbor caregivers and parents about the importance of consistent early relationships for babies and toddlers
Recommendations to support healthy and safe environments

- Center ratios and group size
- Family child care ratio and group size
- Health and safety training
- Monitoring and technical assistance

What are next steps?
What can you do to support continuity of care?

- Access more information resources
  - Infant/toddler specialists, infant mental health consultants, higher education, PITC, Educare

- Spread the word
  - Talk to your colleagues, staff, parents in your program, potential funders, state leaders
What can you do…?

- **Make a plan**
  - Work together in your program to map out what steps and resources would be needed to implement continuity of care

- **Advocate for policy change**
  - Licensing, subsidy, quality investment, incentives and supports
Infant experts

- Program for Infant/Toddler Care (PITC), www.pitc.org
  - Several Region V states (IL, IN, MN, OH) hold PITC training institutes, see website for contact information

- Infant/toddler specialist networks
  - IN (http://www.cfs.purdue.edu/ITSI/overview.asp)
  - OH (http://www.occrra.org/firststeps.htm)

- Ounce of Prevention Fund/Bounce Early Learning Network/Educare
CLASP’s Charting Progress for Babies in Child Care project is a multi-year effort to highlight state policies that support the healthy growth and development of infants and toddlers in child care settings, and to build an online resource to help states implement these policies. In the project’s first year, CLASP and ZERO TO THREE developed a Policy Framework with four key principles that babies and toddlers in child care need and 15 recommendations for states. CLASP is writing research-based rationales to support each of the 15 recommendations.

To date, CLASP has released the following products:

**Policy Framework and Research-Based Rationales**

<table>
<thead>
<tr>
<th>Policy Framework Summary:</th>
